

Portfolio Project Documentation

1. Project Overview

Django portfolio platform with web pages, authentication, REST API, PostgreSQL, Docker, and Nginx.

2. Modules

- accounts_app: auth, dashboard, profile
- projects_app: project CRUD, slug logic
- contact_app: contact form/messages/email
- api_app: DRF endpoints + token auth
- portfolio_site: settings and root routing

3. UML (Textual)

User 1---1 Profile

Project: title, slug, tech_stack, featured, ordering

ContactMessage: name, email, subject, message, read_flag

4. High-Level Diagram

Client -> Nginx -> Django Apps -> PostgreSQL
-> Email Backend

5. Low-Level Flow

Client -> URL Router -> View/APIView -> Serializer/Form -> Model/ORM -> DB -> Response

6. API Surface

/api/projects/, /api/projects/{slug}/, /api/projects/featured/

/api/contact/, /api/profile/, /api/auth/login/, /api/auth/logout/, /api/auth/profile/

7. Security

Session + Token authentication, admin-only write endpoints, CSRF middleware, configurable CORS.
